

Portable Penetrator

Portable Penetration Testing

SECP-INT®
www.secpoint.com

- ✓ Non US based 100% Backdoor Free
- ✓ 9 Scan Profiles, HIPAA, OWASP top 10, Prepare for PCI, Firewall Scan and more
- ✓ Bugtraq ID / Mitre CVE / Ubuntu USN / Microsoft / OSDBB
- ✓ Schedule scans daily, weekly, monthly
- ✓ Prevent Hackers To Access Your Server
- ✓ Vulnerability Scanning
- ✓ Vulnerability Assessment
- ✓ 60.000+ Vulnerabilities
- ✓ Launch Real Exploits and Denial of Service Attacks
- ✓ Security Auditing of any Operating System or Network Device.
- ✓ Reports Branding
- ✓ Detailed Remedies for Identified Vulnerabilities
- ✓ Automatic Database and Firmware Updates
- ✓ Interface Support Videos
- ✓ Secure Design All Data Stored on Unit
- ✓ User Friendly Interface
- ✓ Advanced Web Crawler - SQL Injection - XSS - SSL Vulnerabilities

Both 2.4 GHz and 5.8 GHz Wifi Ranges Supported

PREVENT HACKERS FROM ENTERING YOUR WIFI NETWORK!

Portable penetration testing and wireless auditing

The Portable Penetrator combines the latest hacking and cracking tools that offers the most comprehensive penetration testing kit.

Wireless Auditing

The Portable Penetrator allows you to do real wireless WEP, WPA and WPA2 auditing. Just like an attacker would do it! It highlights any weaknesses in wireless networks and shows how these can be secured most effectively.

60.000+ Database Signatures

The Penetrator vulnerability database consists of more than 12 years of research. The database contains more than 60000+ unique vulnerabilities ready to identify any vulnerability in your network. This database is updated multiple times daily.

Launch Real Exploits and Denial of Service Attacks

You can launch real exploits to verify that an identified vulnerability is exploitable. It is also possible to launch real Denial of Service attacks to test preproduction systems for stability.

Reports Branding

Branding and personalisation of the reports and selling them as a service is allowed.

System or Network Device

The Portable Penetrator is designed to audit any operating system or network device. It is beneficial to audit devices in the network setup to find and rectify any vulnerabilities identified before an attacker can exploit the vulnerabilities.

Detailed Remedies for Identified Vulnerabilities

The Portable Penetrator comes with detailed remedies for identified vulnerabilities. This allows the user to quickly fix the identified vulnerabilities.

Automatic Database and Firmware Updates

The Portable Penetrator will automatically download updates multiple times daily, at the user's discretion, to ensure the vulnerability database is as updated as possible.

Whether you're a security professional or a novice, Portable Penetrator PP3000 is a device which is a complete solution for auditing and improving the level of security of wireless networks. Thanks to built-in report module you will have all the documentation of the security audits you have conducted. The product has a great value for a great value for a complete solution like Portable Penetrator PP3000.

Portable Penetrator

Portable Penetration Testing

Specifications	Portable Penetrator PP2000	Portable Penetrator PP4000	Portable Penetrator PP6000
Vulnerability Scanning Capacity	1-4 IPs	8 IPs	16-1024+ IPs
Vulnerability Assessment & Ticket System	√	√	√
Runs Virtually on Windows / Mac OS X	√	√	√
9 Profile HIPAA, Firewall, Aggressive and more	√	√	√
60.000+ Database Signatures	√	√	√
Launch Real Exploits & Denial of Service	√	√	√
Allowed to Change IP Addresses	√	√	√
Distributed Security Auditing	√	√	√
Automatic database and software updates	√	√	√

Features

Security Audit Features

- √ Vulnerability assessment
- √ 60.000+ signatures
- √ Unlimited auditing
- √ Works out of the box
- √ Advanced auditing options
- √ Launch real exploits
- √ Audit any OS
- √ Automatic web crawl script
- √ OS independent interface
- √ SANS top 20 audit

Easy-to-understand reporting

- √ XML PDF and HTML reports
- √ Reports branding allowed
- √ Option for syslog remote logging

Wireless Auditing

- √ Audit WEP networks
- √ Audit WPA and WPA2 networks
- √ Test the security strength of your wireless networks
- √ Identify hidden networks
- √ 2.4 GHz & 5 GHz
- √ 8 dBi Antenna

Finds Cross Site Scripting, SQL Injection and Web Errors

- √ Automatic web crawling engine identifies known and unknown files on websites
- √ Finds Cross Site Scripting
- √ Finds SQL Injection
- √ Finds Web Errors

Scheduled Auditing

- √ Automatic scheduled auditing
- √ Automatic alert about new identified security vulnerabilities
- √ Shows new vulnerabilities discovered and compares them with old records to show the progress in the security level

Security Audit Configuration

- √ Virtual host auditing
- √ Audit specific ports
- √ Audit specific web directories
- √ Get an email when an audit is finished

Penetration Testing

- √ Launch real exploits for Windows®, Unix®, Routers, Firewalls and more.
- √ Launch real denial of service attacks

Automatic Update

- √ Automatic daily database updates
- √ Automatic firmware updates with new features and functionality
- √ Centralized update point
- √ Automatic alerts when database is expired
- √ Option to upload updates manually via the interface

Scalable and Upgradeable

- √ All units can be upgraded for network growth via a software license
- √ Investment protection

Support and Maintenance

- √ One year database subscription included
- √ Full support included in price
- √ Web-based User Interface (https)
- √ Quick setup wizard
- √ Configuration backup/restore
- √ Email alert and logging via syslog
- √ Built-in diagnostic function
